PLANOGRAM INFORMATION

NEEDA PLANOGRAM INSTRUCTIONS:

Follow the planogram & make set up easy.
Make sure all the re-order tags are placed on the back side of the hook,
they become part of the fixture.
USE THE PLANOGRAM. That will show you which row the hooks are to be placed.
REMEMBER TO OPEN BOXES IN ORDER!

For set-up help, contact Needa at
(810) 733-1111

MATERIAL AND TENSILE STRENGTHS

STAINLESS STEEL FASTENERS

18-8 and 300 Series stainless steel have a tensile strength of approximately 75,000 PSI. Stainless steel is used mostly in areas where rust and weather are a problem.

GRADE 5 FASTENERS

Grade 5 fasteners have a tensile strength of 120,000 PSI. It is the standard for most automotive applications.

GRADE 8 FASTENERS

Grade 8 fasteners have a tensile strength of 150,000 PSI. Grade 8 is used in areas of high heat or when critical strength is required. Use generally for suspension, exhaust or engine applications

MEASURING OF FASTENERS ARE AS FOLLOWS:

Pan Head, Hex Head, Hex Washer Head and Round Head are all measured from the underside of the head to the tip of the shaft. All other screws are measured from end to end.

STYLES / HEAD TYPES

Flat
Hex Head
Hex Washer Head
One Way Head
Oval
Pan
Round
Round Washer Head
Truss
Undercut (Flat, Oval)

DRIVE RECESS TYPES:

Phillips
Phillips Slotted Combination
