**MATERIAL AND TENSILE STRENGTHS**

**STAINLESS STEEL FASTENERS**

18-8 and 300 Series stainless steel have a tensile strength of approximately 75,000 PSI. Stainless steel is used mostly in areas where rust and weather are a problem.

**GRADE 5 FASTENERS**

Grade 5 fasteners have a tensile strength of 120,000 PSI. It is the standard for most automotive applications.

**GRADE 8 FASTENERS**

Grade 8 fasteners have a tensile strength of 150,000 PSI. Grade 8 is used in areas of high heat or when critical strength is required. Use generally for suspension, exhaust or engine applications

**MEASURING OF FASTENERS ARE AS FOLLOWS:**

Pan Head, Hex Head, Hex Washer Head and Round Head are all measured from the underside of the head to the tip of the shaft. All other screws are measured from end to end.
