

TO OUR VALUED CUSTOMERS

Thank you for taking the time to look in our new 2006 catalog. Although we are only five years old, we have grown from 700 items in our first catalog to over 2000 in our newest edition.

Since our inception, we have been put to the test, but we are here and we have shown consistent growth.

Needa Parts, “The Fastest Way To Fixed” is a new saying you will be seeing throughout the new catalog. As we grow, our focus will remain in the small parts and fastener business for the aftermarket. But with every job that we supply the fix for, we are analyzing how we can possibly make the job easier for the installer. From our new pre-assembled fuel line kits to our manufacturer specific hinge pin kits, we want to make your job, and the jobs of every do-it-yourselfer and professional mechanic, the fastest way to fixed.

In this catalog you will find our newest spinner rack, #994114 which has over 750 different great selling items all on one rack. This rack is doing very well in every location it has been placed. In addition, there are many new installer trays along with the new boxed applications for the professional. This past season, we signed a marketing agreement with Goodyear Tire and Rubber Corporation to package, market and deliver a high quality line of hose clamps at a very competitive price. The Goodyear program includes three different styles of clamps, including the OE Smart Clamp® which is the preferred clamp of original equipment manufacturers like Mercedes Benz and General Motors.

Please let us know if you have a way to make a job “The Fastest Way To Fixed”. Annually, we will have awards going to the top three choices. Whether it is a tiny time process we can save, to a major dollar savings for doing the job a bit different, we welcome your input. You are the reason we are here today, and we thank you for that privilege.

Sincerely,
Jim Koleszar
