SEAT REPAIR

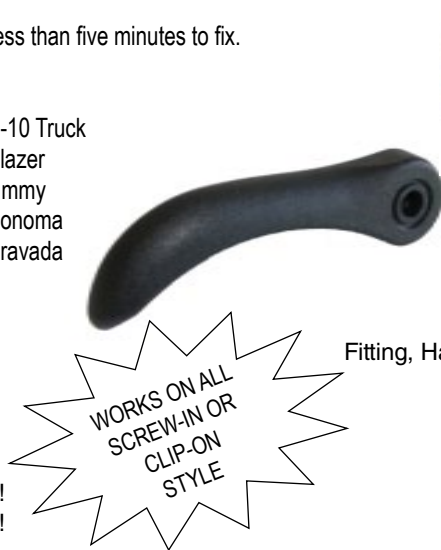

There is a design flaw on the seat recliner pins in Chevy S-10 Trucks, Blazers, Sonomas & Bravadas between 1994-2003. The failure rate has been reported to be as high as 75%. Whether the customer is in for service or it's a trade-in, now you have an alternative to replacing the entire recliner mechanism. Needa Parts Manufacturing introduces six part numbers that will take care of the problem quickly, easily, less expensively and best of all, permanently.

Using Needa's patented repair kit, it takes less than five minutes to fix. Saving you time and money on each repair.

APPLICATIONS: General Motors S-10 Truck
1994 - 2003 Blazer
Jimmy
Sonoma
Bravada

Also works on Lazy Boy recliners, too!

PART #	DESCRIPTION
777771	Gray / Driver
777781	Gray / Passenger
777791	Charcoal / Driver
777801	Charcoal / Passenger
